

Illustration:

ASM and MSM with exact orthoprojection

Convergence: MSM: $\|u - u^{n+1}\|_a \leq q^2 \|u - u^n\|_a$,

ASM: $\|u - u^{n+1}\|_a \leq q \|u - u^n\|_a$,

where $q = \gamma = \cos \alpha = \cos \angle(V_1, V_2) = \cos \angle(V_1^\perp, V_2^\perp)$,
 $\|\cdot\|_a = \sqrt{a(\cdot, \cdot)}$ - energy norm.
